

Displays

DISPLAYS:

Some of vital features of E-POS Monitors that makes them different from the normal CRT Monitors are

- a) Compact Footprint
- b) Low cost & high performance
- c) Best Picture Quality

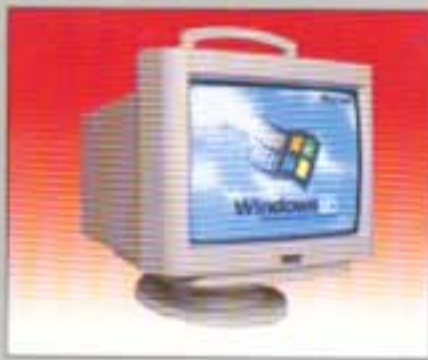

MEP-1038 / MEP-935

- The 9" diagonal display of MEP-1038 & MEP-935 EPoS Mono Monitor gives a crisp clear image with user adjustable viewing angle.
- Although the screen size of MEP-1038 is just 9" it boasts of a powerful 1024 x 768 Super VGA Resolution.
- The MEP-935 & MEP-1038 are an ideal examples of optimum mix of price, performance and functionality. However, only difference is the look.

CEP-1038

- EPoS CEP-1038 10" Colour Monitor is the top of the range monitor with superb quality of design.
- The high-resolution of CEP-1038 has been designed to be compatible with standard VGA and SVGA graphics format.
- An added feature of CEP-1038 is the handle at the top that makes it easy to carry.
- The small footprint of CEP-1038 makes it ideal for space saving applications.

CEP-12"

- The flat screens are based on Liquid Crystal Display Technology.
- The attractive design of LCD screens makes POS absolutely an eye-catcher.
- These screens not only consume less power but also offers flicker free picture.
- CEP-12" is an ideal example of the above features. Equipped with digital adjustment and having TFT (thin film display technology) the CEP promises the best performance even under outside lighting.
- The Touch version of CEP-12" permits fast menu controlled input with the help of 'Elo' Touch.
- The CEP display panels are also available in different sizes like 13.1", 14.1" & 15.1".

EZ202B

NEW

- EZ202B is a low cost Customer display that offers versatility of range of pole attachments interchangeable to four different heights.
- The 2 lines 20 characters of the EPoS pole display shows a significant amount of data and easy to read characters measuring 9 x 6mm.
- The best feature of EZ202B is its 360-degree moving angle ensuring clear visibility to the customers.
- The streamlined design of EZ202b EPoS Pole display is especially suited to speciality stores, restaurants and supermarkets.

CD-5220

The CD-5220 is simply a versatile pole display with innovative design features that gives four possible height configurations in a single package.

Some of vital features of CD-5220 are

- Drop-in replacement (no software adjustments necessary).
- Easy to read under any lighting conditions.
- 5mm x 7mm characters that allow the best viewing characters.
